Register your interest in the Android developer verification early access program

Before we open registration to all developers in March 2026, we're inviting developers for **early access** to the new [Android developer verification](#) experience this year.

We're looking for a diverse mix of developers worldwide, from individual creators to large organizations. By participating, you'll not only get a head start but also help us build an experience that works for everyone. You'll also get

- Priority support for these new requirements.
- An invitation to an exclusive community discussion forum.
- The opportunity to provide feedback and shape the experience for the entire Android ecosystem.

To join the waitlist, please complete this two-minute form. We appreciate your willingness to help!

Note: If you manage apps for different companies or have both an individual and an organization account, please submit a separate survey for each.
